

Independent Auditor's Review Report

To the Directors of the Darling Downs Pipeline Service Providers

Report on the review of the Financial Information within the Financial Reporting Guideline for Non-Scheme Pipeline templates

Conclusion

We have reviewed the financial information in Tables 4, 4.1, 5 and 5.1 of the Financial Reporting Guideline for Non-scheme Pipeline templates (Financial Information) of the Darling Downs Pipeline Service Providers (Service Providers).

The Darling Downs Pipeline Service Providers comprises the following entities:

- Jemena Darling Downs Pipeline (1) Pty Ltd
- Jemena Darling Downs Pipeline (2) Pty Ltd
- Jemena Darling Downs Pipeline (3) Pty Ltd

Based on our review, which is not an audit, nothing has come to our attention that causes us to believe that the Financial Information within the Financial Reporting Guideline for Non-scheme Pipeline templates for the year ended 31 December 2021 is not prepared, in all material respects, in accordance with the Financial Reporting Guideline for Non-Scheme Pipelines (Guideline) issued by the Australian Energy Regulator (AER) on 19 December 2017 and the Basis of Preparation as prescribed by the Guideline.

Emphasis of matter – basis of preparation and restriction on use

The Financial Information has been prepared in accordance with the Basis of Preparation as prescribed by the Guideline and has been prepared by the Directors of the Service Providers to meet their reporting requirements under the Guideline. As a result, the Financial Information and this Auditor's Review Report may not be suitable for another purpose. Our conclusion is not modified in respect of this matter.

Our report is intended solely for the Directors of the Service Providers and should not be used by parties other than the Directors of the Service Providers. We disclaim any assumption of responsibility for any reliance on this report, or on the Financial Information to which it relates, to any person other than the Directors of the Service Providers, or for any other purpose than that for which it was prepared.

Other Information

Other Information is financial and non-financial information in the Service Providers' annual regulatory reporting which is provided in addition to the Financial Information, the Basis of Preparation and the Auditor's Report. The Directors are responsible for the Other Information.

Our opinion on the Financial Information does not cover the Other Information and, accordingly, we do not express any form of assurance conclusion thereon.

In connection with our audit of the Financial Information, our responsibility is to read the Other Information. In doing so, we consider whether the Other Information is materially inconsistent with the Financial Information or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

We are required to report if conclude that there is a material misstatement of this Other Information, and based on the work we have performed on the Other Information that we obtained prior to the date of this Auditor's Report we have nothing to report.

Matters relating to the electronic publication of the reviewed Financial Information

This Auditor's Review Report relates to the Financial Information of the Service Providers for the year ended 31 December 2021 included on the Jemena website. The Directors of the Service Providers are responsible for the integrity of the Jemena website. We have not been engaged to report on the integrity of the Jemena website. The Auditor's Review Report refers only to the subject matter described above. It does not provide a conclusion or opinion on any other information which may have been hyperlinked to/from the Financial Information.

Responsibilities of the Directors and Management for the Financial Information

Management of the Service Providers is responsible for:

- the preparation of the Financial Information in accordance with the requirements of the Guideline and the Basis of Preparation; and
- implementing necessary internal control to enable the preparation of the Financial Information that are free from material misstatement, whether due to fraud or error; and

The Directors of the Service Providers are responsible for:

- overseeing the Service Providers' regulatory reporting process; and
- determining that the Basis of Preparation is appropriate to meet the needs of the AER in order to fulfil the Service Providers' reporting obligations.

Auditor's responsibilities for the review of the Financial Information

Our responsibility is to express a conclusion on the Financial Information in order to state whether, on the basis of the procedures described below, we have become aware of any matter that makes us believe that the Financial Information is materially misstated and does not comply with the requirements of the Guideline.

We conducted our review of the Financial Information in accordance with the *Australian Standard on Review Engagements ASRE 2405 Review of Historical Information Other than a Financial Report*.

A review of the Financial Information consists of:

- Making enquiries with the persons responsible for financial, accounting and regulatory reporting matters to understand the internal controls, governance structure and reporting process of the Financial Information;
- Applying analytical procedures over the Financial Information; and
- Other review procedures including:
 - performing walkthroughs to understand the process for collating of information in the Financial Information with reference to the service provider's source documentation;
 - evaluating the appropriateness of the Basis of Preparation with respect to the Financial Information; and
 - reviewing the Financial Information in its entirety to ensure it is consistent with our overall knowledge of our review engagement.

A review is substantially less in scope than an audit conducted in accordance with *Australian Auditing Standards* and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit or reasonable assurance opinion.

Independence and quality control

As required by ASRE 2405, we have complied with our independence and other relevant ethical requirements of the *Code of Ethics for Professional Accountants* (including Independence Standards) issued by the *Accounting Professional and Ethical Standards Board*, and complied with the applicable requirements of *Australian Standard on Quality Control 1* to maintain a comprehensive system of quality control.

Inherent limitations

Because of the inherent limitations of an assurance engagement, together with the internal control structure it is possible that fraud or error may occur and not be detected. A limited assurance engagement as at specified date does not provide assurance on whether compliance with the Guideline will continue in the future.

Page intentionally blank

OVERVIEW

The Australian Energy Regulator (**AER**) issued a non-scheme pipeline financial reporting guideline (**the Guideline**) in December 2017 issued under Part 23 of the National Gas Rules. This Guideline requires service providers of such pipelines to publish certain financial information about those pipelines.

This Guideline applies to the Darling Downs Pipeline (**DDP**) covering the reporting period 1 January to 31 December 2021.

To apply the Guideline we have adopted the following general interpretations:

- All Jemena Group¹ legal entities that have a controlling interest in DDP are 'service providers' and so all costs incurred, revenue earned or assets owned by those entities that relate to the pipeline should be captured and consolidated in the Gas Market Reform (**GMR**) financial reporting templates.
- Similarly, because SGSPAA is the parent company of the Jemena Group acquisition costs and associated dates (mainly in the Recovered Capital Method (**RCM**) template) are determined by reference to that entity for the purposes of complying with the Guideline. This means for instance that the acquisition of the DDP occurred on 6 June 2017 when the Jemena Group acquired the pipeline from Origin.
- Although the DDP consists of three pipeline licences covering different sections of the pipeline that were constructed at different times, together these form a single transmission pipeline for the purposes of complying with the Guideline – and so costs, revenues and asset values are consolidated across those three licences.
- Actual information includes information calculated directly from information contained in Jemena Group's systems and other records without material judgement required. Estimated information is anything other than actual information.
- To meet the requirements of the Guideline when compiling the RCM valuation (section 4.1), DDP undertook all reasonable steps to obtain historical information where this was not already available to the Jemena Group. These steps are further explained in the RCM section (section 13) of this basis of preparation.
- All 'Previous reporting period' amounts have been sourced from the prior year published GMR financial reporting templates (refer to Tables: 2.1, 2.1.1, 3.1, 3.3).
- Jemena Group costs are direct or indirect in nature. Direct costs, such as maintenance, program management, engineering support are directly allocated to specific assets within the Jemena Group. Jemena Group shared or indirect costs such as IT, finance, legal, people, safety and environment are allocated to specific assets within the Jemena Group in accordance with the principles of the Jemena Group Cost Allocation Methodology procedure. These principles are further explained in the Revenue and Expenses section (section 3) of this Basis of Preparation.
- From 2019 DDP includes lateral and production facility assets which are not included in the DDP regulatory registration. The lateral has a separate regulatory registration for the purposes of Part 23 of the NGR and the production facility is an upstream asset and is therefore excluded from the definition of a pipeline for the purposes of the NGR. Revenues and costs attributable to assets not included in the DDP regulatory registration have been excluded from the DDP financial reporting templates with supporting BoP explanations of the approach adopted (**non-DDP**).

The rest of this basis of preparation document explains how we have populated each of the templates required by the Guideline, including by identifying where estimated data was used when actual data was not available.

¹ The Jemena Group includes SGSP (Australia) Assets Pty Ltd (**SGSPAA**) and its subsidiaries excluding Zinfra Pty Ltd and its subsidiaries. Jemena Group costs may include charges from Zinfra Pty Ltd and its subsidiaries where they relate to the pipeline.

OVERVIEW

As per the Jemena Group access user guide, Jemena Darling Downs Pipeline (1) Pty Ltd, Jemena Darling Downs Pipeline (2) Pty Ltd and Jemena Darling Downs Pipeline (3) Pty Ltd are the service providers for DDP, being the licensed operators. The other service providers in the Jemena Group have appointed Jemena Darling Downs Pipeline (1) Pty Ltd, Jemena Darling Downs Pipeline (2) Pty Ltd and Jemena Darling Downs Pipeline (3) Pty Ltd as the responsible service provider for the purposes of publishing the financial information.

DDP collects such items using cost elements and projects. </p> <p><u>Other revenue</u></p>	N/A

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
					<p>References the 'Total' in 'Table 2.3.1: Indirect revenue allocation'.</p> <p><u>Non-DDP revenue</u></p> <p>Refer to BoP Reference 2.1.1.a for the explanation of the methodology applied to remove Non-DDP revenue from Firm forward haul transportation services (part of Total service revenue).</p>	
Table 2.1 Statement of pipeline revenues and expenses	2.1.b	Direct Costs, Shared Costs, Earnings before interest and tax (EBIT)	Estimate (Non-DDP allocation)	ERP System (SAP)	<p>Most of the entities within SGSPAA and its controlled entities use an Enterprise Resource Planning (ERP) system known as SAP to collect costs. DDP as part of the Jemena Group, uses SAP to record its financial transactions. Costs are collected in planned maintenance orders (PMO) that cascade up to projects (WBS elements) in SAP based on the activity, on which an employee works or where an external supplier provides goods/services.</p> <p>A reporting tool (BI) is used to download the operating expenditure costs from SAP. The data is aggregated by WBS element and general ledger account code (cost element) and mapped into the relevant cost category of the template.</p> <p><u>Related party and non-related party</u></p> <p>The majority of costs that DDP incurs are sourced from a related entity, Jemena Asset Management Pty Ltd (JAM), which is part of the Jemena Group. JAM records costs that are attributable to DDP and uses SAP functionality to</p>	<p>Estimates applied are an appropriate basis to calculate DDP Costs:</p> <ul style="list-style-type: none"> Management expert estimate of the non-DDP routine maintenance costs based on technical understanding and experience of the routine maintenance requirements for the key components making up the Atlas asset is an appropriate basis to estimate (estimate) Non-Maintenance costs calculated as non-DDP revenue as a percentage of total revenue multiplied by the remaining DDP non-maintenance opex stack.

3 — REVENUES AND EXPENSES

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
					<p>transfer such costs at zero margin to DDP. These costs are reported in the 'related party transactions' column. Where project costs are collected directly to the pipeline and not through a related party entity they were reported in the 'amounts excluding related party transactions' column.</p> <p><u>Direct costs and Shared costs</u></p> <p>Direct and shared cost classification is based upon the activity/service category codes included as part of the WBS element structure for each project. An activity/service mapping table is used to map activities into relevant cost categories:</p> <ul style="list-style-type: none"> • Direct Costs: Asset Management (Asset: Strategy, Planning, Investment, Information and Management system activities), Service Delivery (Construction & Supply Chain, Maintenance & Faults, Network Control & Emergency Maintenance, Metering, Customer Service), Customer and Markets (Commercial Management). • Shared Costs: Enterprise Support Functions (executive management, finance, legal, human resources, information technology (IT) etc.). Note: Shared costs flow into Table 2.1 from Table 2.4 1 Shared cost allocation. 	

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
					<p>Corporate property costs have similarly been allocated between direct and shared costs based on property usage by function</p> <p><u>Mapping into the template categories</u></p> <p>The cost element description field from costs within DDP was used to map into the template’s categories (e.g. ‘wages’, ‘other direct costs’, ‘employee costs’, ‘indirect operating expenses’, etc.). DDP has interpreted direct wages as the payroll costs assigned to staff who directly work on the pipeline. DDP’s shared employee costs are the allocated payroll costs of administration type staff such as finance, legal, people, safety and environment.</p> <p>Where project descriptions and activity/service category codes support classification within a more specific category then the cost element based mapping was overridden². The following description categories were populated based on project description/activity code mapping:</p> <ul style="list-style-type: none"> • Information technology and communication costs • Rental and leasing costs • Repairs and maintenance • Licence and regulatory costs • Leasing and rental costs 	

² Labour cost element mapping was not overridden based on project descriptions and activity/service category code mapping.

3 — REVENUES AND EXPENSES

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
					<p>Note: Insurance costs are included in the enterprise supports costs which are shared across the Jemena Group, therefore a \$nil value has been reported for Direct Insurance costs.</p> <p><u>Earnings before Interest and tax (EBIT)</u> EBIT is calculated as:</p> <p style="padding-left: 40px;">Total revenue (excluding Non-DDP revenue) less Total costs (excluding Non-DDP opex)</p> <p><u>Non-DDP direct costs and Non-DDP shared costs</u> Non-DDP direct costs and Non-DDP shared costs were estimated by aggregating the following amounts and then removing them from the DDP Opex stack:</p> <ul style="list-style-type: none"> • Specially identifiable non-DDP non-routine maintenance (<i>actual</i>) • Management expert estimate of the non-DDP routine maintenance costs based on technical understanding and experience of the routine maintenance requirements for the key components making up the Atlas asset (<i>estimate</i>) • Non-Maintenance costs calculated as non-DDP revenue as a percentage of total revenue <i>multiplied</i> by the remaining DDP non-maintenance opex stack. (<i>estimate</i>) 	

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
Table 2.1 Statement of pipeline revenues and expenses	2.1.c	Depreciation, Shared Asset Depreciation	Actual	<p>SAP – Fixed Asset Movement Report (FAMR) and Equipment Register</p> <p>The SGSPAA Group Consolidation support schedule (Business Combination Adjustments and Goodwill)</p>	<p><u>SAP FAMR</u> A detailed FAMR was downloaded from SAP.</p> <p><u>SGSPAA Group Consolidation supporting schedule</u> Depreciation expense was extracted from the SGSPAA Group Consolidation supporting schedule for pipeline assets not included in the SAP FAMR.</p> <p>Total depreciation was based on the mapping of the individual assets in the FAMR applied in Table 3.3 Depreciation. DDP used the FAMR Asset descriptions, category and equipment register descriptions to map individual assets into specific categories.</p> <p>All depreciation expenses are recorded directly within the Pipeline and are not transferred from a related party entity and therefore are reported in the 'Amounts excluding related party transactions' column.</p> <p><u>Reconciling difference between Table 2.1 Depreciation with Table 3.3.1 Current year depreciation</u></p>	N/A

3 — REVENUES AND EXPENSES

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
					<p>The AER template file includes a Summary worksheet with a reconciliation between Table 2.1 Depreciation with Table 3.3.1 Current year depreciation. Where there is a reconciling difference between the two tables it is attributable to disposals of assets in the current year resulting in a reversal of accumulated depreciation in the SAP ledger (Balance sheet entry only) reported only in Table 3.3.1 Current year depreciation. Table 2.1 is the relevant source to refer to for depreciation expense impacting the Profit and loss template in the current year.</p> <p><u>Non-DDP Asset Depreciation</u> Refer to BoP Reference 3.3.1.a for the methodology applied to remove depreciation expense attributable to Non-DDP assets.</p>	

4. REVENUE BY SERVICE

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
Table 2.1.1: Revenue by service	2.1.1.a	Description, Reporting period - Amount excluding related party transactions, Reporting period - Related party transactions	Actual(except for estimate of revenue attributable to Atlas)	PypIT and SAP	<p><u>Description</u></p> <p>The 'description' categories are pre-populated by the AER for this template.</p> <p><u>Reporting period -Amount excluding related party transactions</u></p> <p>Revenue by service is sourced from the Weighted Average Price (WAP) template where a revenue transaction report that discloses revenue by service types, was downloaded from the PypIT system for the reporting period. A Subject Matter Expert mapped the revenue service types against the relevant 'Service description' categories based on knowledge and the nature of the underlying revenue transactions. DDP has also included other revenue items that are not sourced from PypIT. These include miscellaneous revenue items such as profit from sale of fixed assets and revenue from non-gas transportation activities.</p> <p><u>Firm forward haul transportation services removing Non-DDP revenue</u></p> <p>The relevant Atlas services form part of a single delivered service and are not charged in their separate component parts.</p> <p>The Non-DDP portion of the revenue which needs to be removed from the DDP financial templates has been calculated as the balance remaining after deducting the</p>	Published reference tariffs are an appropriate price basis to calculate the revenue attributable to DDP1 & DDP3.

	Reference	Item	Actual / Estimate			
Table 2.4.1 Shared Cost Allocation	2.4.1.a	Description categories, Shared costs excluding related parties, Shared costs paid to related parties, (Gross shared costs), Percent allocated to pipeline, Total allocated to pipeline excluding related parties.	Actual	SAP	<p>Shared Costs relate to enterprise support functions such as executive management, finance, legal, information technology (IT), human resources etc.</p> <p><u>Description categories</u></p> <p>The cost element description field from costs within DDP was used to map into the template's categories (e.g. 'wages', 'other direct costs', 'employee costs', 'indirect operating expenses', etc.).</p> <p>Project descriptions were also used as a basis to categorise costs into description categories (e.g. 'Information technology and communication costs').</p> <p>Where project descriptions and activity/service category codes supported classification within a more specific category then the cost element based mapping was overridden³. The following description categories were populated based on project description/activity code mapping:</p> <ul style="list-style-type: none"> • Information technology and communication costs • Rental and leasing costs 	The causal drivers that allocate shared costs to DDP are a reasonable method for such allocations.

³ Labour cost element mapping was not overridden based on project descriptions and activity/service category code mapping.

7 — SHARED COSTS

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
					<p><u>Related party and non-related party:</u></p> <ul style="list-style-type: none"> • <u>Shared costs excluding related parties</u> Where project costs are allocated directly to the pipeline and not through a related party entity they were reported in the 'Shared costs excluding related parties' column. Shared asset depreciation is the only value included in this column as depreciation is based on shared assets purchased by the Jemena Group and allocated to DDP. • <u>Shared costs paid to related parties.</u> The gross shared costs paid to related parties e.g. Finance, Legal, Managing Director are the total shared costs incurred across the Jemena Group before allocating to specific assets (e.g. pipelines, distribution networks etc.). Gross shared costs are collected in SAP at the JAM entity. It is at this entity that the allocation of shared costs occur. These allocated costs are transferred to DDP using SAP functionality and mapped into the template categories based on a methodology consistent with the approach outlined above for net shared costs, therefore based on: <ul style="list-style-type: none"> • cost element mapping; and • project descriptions and activity/service category codes <p><u>Percent allocated to pipeline and total allocated to pipeline excluding related parties</u></p> <p>As described above, the majority of costs that DDP incurs are sourced from a related entity JAM which records costs</p>	

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
					<p>that are attributable to DDP and uses SAP functionality that transfers such costs at zero margin to DDP. These costs are reported in the 'Shared costs paid to related parties' column.</p> <p>Shared costs are allocated to the pipeline in the following ways:</p> <ul style="list-style-type: none"> • Directly to the asset through a PM Order which is the lowest level cost collector. PM Order's settle or cascade up to a specific project (WBS) in SAP. • Based on allocation methodologies such as historic time-writing data. • Causal drivers e.g. number of laptops users for IT Telecommunication costs. <p>The costs allocated to each shared cost category (e.g. 'Employee costs', 'information technology and communication costs' etc.) is an aggregate of one or more projects with varying cost allocation percentages from the different shared functions.</p> <p>The percentage allocated to a pipeline is calculated as: <i>Amounts allocated to pipeline divided by the gross amount across the Jemena Group.</i></p> <p>The shared costs allocated to the pipeline is sourced from SAP using a combination of projects and cost elements.</p>	

8 — STATEMENT OF PIPELINE ASSETS

8. STATEMENT OF PIPELINE ASSETS

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
Table 3.1: Pipeline assets	3.1.a	Initial construction cost, Initial purchase cost, Additions, Additions and improvements capitalised, Capitalised maintenance, Asset disposal (at cost), Depreciation.	Actual	Table 3.3.1: Fixed assets at cost - pipeline assets Table 3.3.2: Shared assets at cost (less straight line depreciation)	<p>All items were populated based on Australian Energy Regulator (AER) designed formulas which referenced the supporting 'Table 3.3.1: Fixed assets at cost - pipeline assets'. and 'Table 3.3.2: Shared assets at cost'</p> <p><u>Non-core pipeline assets</u></p> <p>No allocation of non-core pipeline assets has been included in Table 3.1 where there is a remote nexus with the pipeline activities such as treasury hedging financial instruments, defined benefit assets, minor assets sitting in JAM (receivables etc.), and other corporate assets etc.</p> <p>Reclassification of Previous reporting period 'Other depreciable pipeline assets' from Additions to Initial construction or acquisition costs</p> <p>Contract intangible assets \$49,192,000 reported within the 'Other depreciable pipeline assets' category have been reclassified from the 'Additions' row to the 'Initial construction or acquisition cost' row based on supporting artefacts identifying that the contract intangible assets formed part of the assets at the time of Jemena's acquisition of DDP.</p> <p><u>Non-DDP Assets</u></p> <p>Refer to BoP Reference 3.3.1.a for the methodology applied to remove non-DDP Assets from the template.</p>	

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
			Actual	The SGSPAA Group Consolidation support schedule (Business Combination Adjustments and Goodwill)	The SGSPAA Group consolidates its business combination adjustments at the SGSPAA level, meaning that it does not distribute any business combination adjustments to its subsidiary entities. The business combination adjustments are maintained in an excel spreadsheet. Business combination adjustments (original cost and accumulated depreciation) that relate to DDP have been allocated to the categories in the template on the basis of fixed asset information contained in a Business combination uplift schedule and input from a subject matter expert who assisted in the categorisation of these adjustments into the template categories.	DDP believes that the allocation is reasonable as it is based on information contained in the Business combination uplift schedule maintained by SGSPAA. This schedule has sufficient DDP pipeline fixed asset categorisation that formed the basis of the allocation of the assets as categorised in the template.
Table 3.1: Pipeline assets	3.1.a.1	Other non-depreciable pipeline assets	Actual	The SGSPAA Group Consolidation support schedule (Business Combination Adjustments and Goodwill) SAP	<u>Other non-depreciable pipeline assets - SGSPAA Group Consolidation support schedule</u> The SGSPAA Group consolidates its resulting Goodwill from acquisitions at a SGSPAA level, meaning that it does not pass-on any Goodwill into its subsidiary entities. The business combination adjustments are maintained in an excel spreadsheet outside the SGSPAA Group's SAP system and allocated to the SGSPAA Group's cash generating units (e.g. pipelines) for the purpose of impairment testing, in accordance with Australian Accounting Standards. The Guideline does not restrict consideration to only those assets identifiable at the direct pipeline owning entity level and accordingly DDP allocated	As there is no specific Goodwill category, DDP has included Goodwill in the 'Other non-depreciable pipeline assets' in the template.

8 — STATEMENT OF PIPELINE ASSETS

ESTIMATED INFORMATION

Table Name	Base Information			Population Approach	Why it was not possible for the SGSPAA to provide actual information	Steps SGSPAA took to locate actual information;	Basis for the estimate, including the methods, assumptions and inputs used	Why the estimate represents the best estimate possible in the circumstances and has been arrived at on a reasonable basis.
	Asset Description	Year	Item / Description	Actual / Estimate				
Table 2.1 Statement of pipeline revenues and expenses; and Table 2.1.1: Revenue by service	N/A	2019 - 2021	Firm forward haul transportation services	Estimate	Actual tariff information does not exist as the relevant services form part of a single delivered service and not charged in their separate component parts.	Analysis was performed to identify options to split the revenue between Atlas (Production facility & Lateral), DDP1 (PPL90) & DDP3 (PPL134) however no actual information sources were identified.	Rely on published reference tariffs for DDP1 & DDP3 to determine the revenue attributable to DDP as a part of the single delivered service.	The reference tariffs are the published price (on the Jemena website) to use the DDP. Accordingly, using these prices provides the best estimate of DDP1 and DDP3 revenue.
Table 2.1 Statement of pipeline revenues and expenses; and Table 2.1.1: Revenue by service	N/A	2019 - 2021	Direct Costs, Shared Costs	Estimate	Actual costs are not separately collected for DDP instead costs are captured together with non-DDP assets.	Analysis was performed to identify options to split DDP and Non-DDP: direct cost and shared costs; however no actual information sources were identified.	Non-DDP direct costs and Non-DDP shared costs were estimated by aggregating the following amounts and then removing them from the DDP Opex stack: <ul style="list-style-type: none"> • Specially identifiable non-DDP non-routine maintenance (<i>actual</i>) 	The estimate is a best estimate because it has been calculated based on the following inputs which are sourced based on best available information: <ul style="list-style-type: none"> • Technical engineering identification of specific non-routine Maintenance costs incurred and estimation of routine maintenance based

						<p>data for the WAP calculation. A planned completion date for these software changes has not been finalised.</p>	<p>schedules and actual deliveries for all our shippers and services. Currently there is no report in place in PypIT that provides the data in a way to be used to calculate the WAP. VicHub is required to manually extract the relevant information to be used in the calculations and include/exclude components in the calculations based on the assumptions associated with Table 5.1.</p> <p>Due to the recategorisation / split out of the raw data from the report and the calculation of the weighted average prices based on these manually adjusted figures, the data</p>	<p>alternative information available to us at this time.</p>
