

Independent Auditor's Review Report

To the Directors of the Eastern Gas Pipeline Service Providers

Report on the review of the Financial Information within the Financial Reporting Guideline for Non-Scheme Pipeline templates

Conclusion

We have reviewed the financial information in Tables 4, 4.1, 5 and 5.1 of the Financial Reporting Guideline for Non-scheme Pipeline templates (Financial Information) of the Eastern Gas Pipeline Service Providers (Service Providers).

The Eastern Gas Pipeline Service Providers comprises the following entities:

- Jemena Eastern Gas Pipeline (1) Pty Ltd
- Jemena Eastern Gas Pipeline (2) Pty Ltd

Based on our review, which is not an audit, nothing has come to our attention that causes us to believe that the Financial Information within the Financial Reporting Guideline for Non-scheme Pipeline templates for the year ended 31 December 2021 is not prepared, in all material respects, in accordance with the Financial Reporting Guideline for Non-Scheme Pipelines (Guideline) issued by the Australian Energy Regulator (AER) on 19 December 2017 and the Basis of Preparation as prescribed by the Guideline.

Emphasis of matter – basis of preparation and restriction on use

The Financial Information has been prepared in accordance with the Basis of Preparation as prescribed by the Guideline and has been prepared by the Directors of the Service Providers to meet their reporting requirements under the Guideline. As a result, the Financial Information and this Auditor's Review Report may not be suitable for another purpose. Our conclusion is not modified in respect of this matter.

Our report is intended solely for the Directors of the Service Providers and should not be used by parties other than the Directors of the Service Providers. We disclaim any assumption of responsibility for any reliance on this report, or on the Financial Information to which it relates, to any person other than the Directors of the Service Providers, or for any other purpose than that for which it was prepared.

Other Information

Other Information is financial and non-financial information in the Service Providers' annual regulatory reporting which is provided in addition to the Financial Information, the Basis of Preparation and the Auditor's Report. The Directors are responsible for the Other Information.

Our opinion on the Financial Information does not cover the Other Information and, accordingly, we do not express any form of assurance conclusion thereon.

In connection with our audit of the Financial Information, our responsibility is to read the Other Information. In doing so, we consider whether the Other Information is materially inconsistent with the Financial Information or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

We are required to report if conclude that there is a material misstatement of this Other Information, and based on the work we have performed on the Other Information that we obtained prior to the date of this Auditor's Report we have nothing to report.

Matters relating to the electronic publication of the reviewed Financial Information

This Auditor's Review Report relates to the Financial Information of the Service Providers for the year ended 31 December 2021 included on the Jemena website. The Directors of the Service Providers are responsible for the integrity of the Jemena website. We have not been engaged to report on the integrity of the Jemena website. The Auditor's Review Report refers only to the subject matter described above. It does not provide a conclusion or opinion on any other information which may have been hyperlinked to/from the Financial Information.

Responsibilities of the Directors and Management for the Financial Information

Management of the Service Providers is responsible for:

- the preparation of the Financial Information in accordance with the requirements of the Guideline and the Basis of Preparation; and
- implementing necessary internal control to enable the preparation of the Financial Information that are free from material misstatement, whether due to fraud or error; and

The Directors of the Service Providers are responsible for:

- overseeing the Service Providers' regulatory reporting process; and
- determining that the Basis of Preparation is appropriate to meet the needs of the AER in order to fulfil the Service Providers' reporting obligations.

Auditor's responsibilities for the review of the Financial Information

Our responsibility is to express a conclusion on the Financial Information in order to state whether, on the basis of the procedures described below, we have become aware of any matter that makes us believe that the Financial Information is materially misstated and does not comply with the requirements of the Guideline.

We conducted our review of the Financial Information in accordance with the *Australian Standard on Review Engagements ASRE 2405 Review of Historical Information Other than a Financial Report*.

A review of the Financial Information consists of:

- Making enquiries with the persons responsible for financial, accounting and regulatory reporting matters to understand the internal controls, governance structure and reporting process of the Financial Information;
- Applying analytical procedures over the Financial Information; and
- Other review procedures including:
 - performing walkthroughs to understand the process for collating of information in the Financial Information with reference to the service provider's source documentation;
 - evaluating the appropriateness of the Basis of Preparation with respect to the Financial Information; and
 - reviewing the Financial Information in its entirety to ensure it is consistent with our overall knowledge of our review engagement.

A review is substantially less in scope than an audit conducted in accordance with *Australian Auditing Standards* and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit or reasonable assurance opinion.

Independence and quality control

As required by ASRE 2405, we have complied with our independence and other relevant ethical requirements of the *Code of Ethics for Professional Accountants* (including Independence Standards) issued by the *Accounting Professional and Ethical Standards Board*, and complied with the applicable requirements of *Australian Standard on Quality Control 1* to maintain a comprehensive system of quality control.

Inherent limitations

Because of the inherent limitations of an assurance engagement, together with the internal control structure it is possible that fraud or error may occur and not be detected. A limited assurance engagement as at specified date does not provide assurance on whether compliance with the Guideline will continue in the future.

Eastern Gas Pipeline

Basis of Preparation

Public

Year ended 31 December 2021

Page intentionally blank

OVERVIEW

The Australian Energy Regulator (AER) issued a non-scheme pipeline financial reporting guideline (the Guideline) in December 2017 issued under Part 23 of the National Gas Rules. This guideline requires service providers of such pipelines to publish certain financial information about those pipelines.

This guideline applies to the Eastern Gas Pipeline (**EGP**) covering the reporting period 1 January to 31 December 2021.

To apply the guideline we have adopted the following general interpretations:

- All Jemena Group¹ legal entities that have a controlling interest in EGP are 'service providers' and so all costs incurred, revenue earned or assets owned by those entities that relate to the pipeline should be captured and consolidated in the financial reporting templates.
- Similarly, because SGSPAA is the parent company of the Jemena Group acquisition costs and associated dates (mainly in the Recovered Capital Method (**RCM**) template) are determined by reference to that entity for the purposes of complying with the guideline. This means for instance that acquisition of the EGP occurred on 1 Aug 2007 when the Jemena Group acquired the pipeline from the Alinta Group.
- Actual information includes information calculated directly from information contained in Jemena Group's systems and other records without material judgement required. Estimated information is anything other than actual information.
- To meet the requirements of the Guideline when compiling the RCM valuation (section 4.1) EGP undertook all reasonable steps to obtain historical information where this was not already available to the Jemena Group. These steps are further explained in the RCM section of this basis of preparation.
- All 'Previous reporting period' amounts have been sourced from the prior year published Gas Market Reform (**GMR**) templates (refer to Tables: 2.1, 2.1.1, 3.1, 3.3).
- Jemena Group costs are direct or indirect in nature. Direct costs, such as maintenance, program management, engineering support are directly allocated to specific assets within the Jemena Group. Jemena Group shared or indirect costs such as IT, finance, legal, people, safety and environment are allocated to specific assets within the Jemena Group in accordance with the principles of the Jemena Group Cost Allocation Methodology procedure. These principles are further explained in the Revenue and Expenses section (section 3) of this basis of preparation.

The rest of this basis of preparation document explains how we have populated each of the templates required by the Guideline, including by identifying where estimated data was used when actual data was not available.

As per the Jemena Group access user guide, Jemena Eastern Gas Pipeline (1) Pty Ltd and Jemena Eastern Gas Pipeline (2) Pty Ltd are the service providers for EGP, being the licensed operators. The other service providers in the Jemena Group have appointed Jemena Eastern Gas Pipeline (1) Pty Ltd and Jemena Eastern Gas Pipeline (2) Pty Ltd as the responsible service provider for the purposes of publishing the financial information.

¹ The Jemena Group includes SGSP (Australia) Assets Pty Ltd (**SGSPAA**) and its subsidiaries excluding Zinfra Pty Ltd and its subsidiaries. Jemena Group costs may include charges from Zinfra Pty Ltd and its subsidiaries where they relate to the pipeline.

3 — REVENUES AND EXPENSES

3. REVENUES AND EXPENSES

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
Table 2.1 Statement of pipeline revenues and expenses	2.1.a	Description	Actual	<p>Populated based on formulas referencing supporting schedules.</p> <p>SAP</p> <p>SAP</p>	<p><u>Total service revenue</u> References 'Total service revenue' in 'Table 2.1.1 Revenue by service'.</p> <p><u>Customer Contributions Revenue</u> References 'Total' in 'Table 2.2.1: Customer contributions received'.</p> <p><u>Government Contributions Revenue</u> References 'Total' in 'Table 2.2.2: Government contributions received'.</p> <p><u>Profit from sale of fixed assets</u> EGP captures such amounts in its accounting systems and was sourced from the EGP's Trial Balance (TB).</p> <p><u>Other direct revenue</u> Includes:</p> <ul style="list-style-type: none"> Items that are not pipeline service related. EGP collects such items using costs elements and projects. 	N/A

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
					<p><u>Other revenue</u></p> <p>References the 'Total' in 'Table 2.3.1: Indirect revenue allocation'.</p>	
Table 2.1 Statement of pipeline revenues and expenses	2.1.b	Direct Costs, Shared Costs, Earnings before interest and tax (EBIT)	Actual	ERP System (SAP)	<p>Most of the entities within SGSPAA and its controlled entities use an Enterprise Resource Planning (ERP) system known as SAP to collect costs. The Eastern Gas Pipeline (EGP) as part of the Jemena Group, uses SAP to record its financial transactions. Costs are collected in planned maintenance orders (PMO) that cascade up to projects (WBS elements) in SAP based on the activity, on which an employee works or where an external supplier provides goods/services.</p> <p>A reporting tool (BI) is used to download the operating expenditure costs from SAP. The data is aggregated by WBS element and general ledger account code (cost element) and mapped into the relevant cost category of the template.</p> <p><u>Related party and non-related party</u></p> <p>The majority of costs that EGP incurs are sourced from a related entity, Jemena Asset Management Pty Ltd (JAM), which is part of the Jemena Group. JAM records costs that are attributable to EGP and uses SAP functionality to transfer such costs at zero margin to EGP. These costs are reported in the 'related party transactions' column. Where project costs are collected directly to the pipeline and not</p>	N/A

3 — REVENUES AND EXPENSES

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
					<p>through a related party entity they were reported in the 'amounts excluding related party transactions' column.</p> <p><u>Direct costs and Shared costs</u></p> <p>Direct and shared cost classification is based upon the activity/service category codes included as part of the WBS element structure for each project. An activity/service mapping table is used to map activities into relevant cost categories:</p> <ul style="list-style-type: none"> • Direct Costs: Asset Management (Asset: Strategy, Planning, Investment, Information and Management system activities), Service Delivery (Construction & Supply Chain, Maintenance & Faults, Network Control & Emergency Maintenance, Metering, Customer Service), Customer and Markets (Commercial Management). • Shared Costs: Enterprise Support Functions (executive management, finance, legal, human resources, information technology (IT) etc.). Note: Shared costs flow into Table 2.1 from Table 2.4 1 Shared cost allocation. <p>Corporate property costs have similarly been allocated between direct and shared costs based on property usage by function.</p> <p><u>Mapping into the template categories</u></p>	

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
					<p>The cost element description field from costs within EGP was used to map into the template's categories (e.g. 'wages', 'other direct costs', 'employee costs', 'indirect operating expenses', etc.). EGP has interpreted direct wages as the payroll costs assigned to staff who directly work on the pipeline. EGP's shared employee costs are the allocated payroll costs of administration type staff such as finance, legal, people, safety and environment.</p> <p>Where project descriptions and activity/service category codes support classification within a more specific category then the cost element based mapping was overridden². The following description categories were populated based on project description/activity code mapping:</p> <ul style="list-style-type: none"> • Information technology and communication costs • Rental and leasing costs • Repairs and maintenance • Licence and regulatory costs • Leasing and rental costs <p>Note: Insurance costs are included in the enterprise support costs which are shared across the Jemena Group, therefore a \$nil value has been reported for Direct Insurance costs.</p> <p><u>Earnings before Interest and tax (EBIT)</u> EBIT is calculated as:</p>	

² Labour cost element mapping was not overridden based on project descriptions and activity/service category code mapping.

3 — REVENUES AND EXPENSES

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
					Total revenue less Total costs	
Table 2.1 Statement of pipeline revenues and expenses	2.1.c	Depreciation, Shared Asset Depreciation	Actual	<p>SAP – Fixed Asset Movement Report (FAMR) and Equipment Register</p> <p>The SGSPAA Group Consolidation support schedule (Business Combination Adjustments and Goodwill)</p>	<p><u>SAP FAMR</u> A detailed FAMR was downloaded from SAP.</p> <p><u>SGSPAA Group Consolidation supporting schedule</u> Depreciation expense was extracted from the SGSPAA Group Consolidation supporting schedule for pipeline assets not included in the SAP FAMR.</p> <p>Total depreciation was classified between direct depreciation and shared asset depreciation based on the mapping of the individual assets in the FAMR applied in Table 3.3 Depreciation. EGP used the FAMR Asset descriptions, category and equipment register descriptions to map individual assets into specific categories.</p> <p>All depreciation expenses are recorded directly within the Pipeline and are not transferred from a related party entity and therefore are reported in the 'Amounts excluding related party transactions' column.</p> <p><u>Reconciling difference between Table 2.1 Depreciation with Tables 3.3.1 & 3.3.2 Current year depreciation</u></p>	N/A

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
					<p>The AER template file includes a Summary worksheet with a reconciliation between Table 2.1 Depreciation with Table 3.3.1 & 3.3.2 Current year depreciation. Where there is a reconciling difference between the two tables it is attributable to disposals of assets in the current year resulting in a reversal of accumulated depreciation in the SAP ledger (Balance sheet entry only) reported only in Tables 3.3.1 & 3.3.2 Current year depreciation. Table 2.1 is the relevant source to refer to for depreciation expense impacting the Profit and loss template in the current year.</p>	

4 — REVENUE BY SERVICE

4. REVENUE BY SERVICE

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
Table 2.1.1: Revenue by service	2.1.1.a	Description, Reporting period - Amount excluding related party transactions, Reporting period - Related party transactions	Actual	PypIT and SAP	<p><u>Description</u></p> <p>The 'description' categories are pre-populated by the AER for this template.</p> <p><u>Reporting period -Amount excluding related party transactions</u></p> <p>Revenue by service is sourced from the Weighted Average Price (WAP) template where a revenue transaction report that discloses revenue by service types, was downloaded from the PypIT system for the reporting period. A Subject Matter Expert mapped the revenue service types against the relevant 'Service description' categories based on knowledge and the nature of the underlying revenue transactions. EGP has included other revenue items that is not sourced from PypIT. These include miscellaneous revenue items such as profit from sale of fixed assets and revenue from non-gas transportation activities, revenue rebates incurred.</p> <p><u>Reporting period -Related party transactions</u></p> <p>EGP did not have any revenue from its related parties.</p> <p><u>Other pipeline services (if relevant)</u></p> <p>Includes:</p> <ul style="list-style-type: none"> • Day Ahead Auction proceeds 	N/A

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
					<ul style="list-style-type: none"> • Items that are miscellaneous in nature. EGP collects such items using cost elements and projects; and • That is exempt WAP services.

7 — SHARED COSTS

7. SHARED COSTS

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
Table 2.4.1 Shared Cost Allocation	2.4.1.a	<p>Description categories,</p> <p>Shared costs excluding related parties,</p> <p>Shared costs paid to related parties, (Gross shared costs),</p> <p>% allocated to pipeline,</p> <p>Total allocated to pipeline excluding related parties.</p>	Actual	SAP	<p>Shared Costs relate to enterprise support functions such as executive management, finance, legal, information technology (IT), human resources etc.</p> <p><u>Description categories</u></p> <p>The cost element description field from costs within EGP was used to map into the template's categories (e.g. 'wages', 'other direct costs', 'employee costs', 'indirect operating expenses', etc.).</p> <p>Project descriptions were also used as a basis to categorise costs into description categories (e.g. 'Information technology and communication costs').</p> <p>Where project descriptions and activity/service category codes supported classification within a more specific category then the cost element based mapping was overridden³. The following description categories were populated based on project description/activity code mapping:</p> <ul style="list-style-type: none"> Information technology and communication costs 	The causal drivers that allocate shared costs to EGP are a reasonable method for such allocations

³ Labour cost element mapping was not overridden based on project descriptions and activity/service category code mapping.

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
					<ul style="list-style-type: none"> Rental and leasing costs <p><u>Related party and non-related party:</u></p> <ul style="list-style-type: none"> <u>Shared costs excluding related parties</u> Where project costs are allocated directly to the pipeline and not through a related party entity they were reported in the 'Shared costs excluding related parties' column. Shared asset depreciation is the only value included in this column as depreciation is based on shared assets purchased by the Jemena Group and allocated to EGP. <u>Shared costs paid to related parties.</u> The gross shared costs paid to related parties e.g. Finance, Legal, Managing Director are the total shared costs incurred across the Jemena Group before allocating to specific assets (e.g. pipelines, distribution networks etc.). Gross shared costs are collected in SAP at the JAM entity. It is from this entity that the allocation of shared costs occur. These allocated costs are transferred to EGP using SAP functionality and mapped into the template categories based on a methodology consistent with the approach outlined above for net shared costs, therefore based on: <ul style="list-style-type: none"> cost element mapping; and 	

7 — SHARED COSTS

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
					<ul style="list-style-type: none"> project descriptions and activity/service category codes <p><u>% allocated to pipeline and total allocated to pipeline excluding related parties.</u></p> <p>As described above, the majority of costs that EGP incurs are sourced from a related entity JAM which records costs that are attributable to EGP and uses SAP functionality that transfers such costs at zero margin to EGP. These costs are reported in the 'Shared costs paid to related parties' column.</p> <p>Shared costs are allocated to the pipeline in the following ways:</p> <ul style="list-style-type: none"> Directly to the asset through a PM Order which is the lowest level cost collector. PM Order's settle or cascade up to a specific project (WBS) in SAP. Based on allocation methodologies such as historic time-writing data. Causal drivers e.g. number of laptops users for IT Telecommunication costs. <p>The costs allocated to each shared cost category (e.g. 'Employee costs', 'information technology and communication costs' etc.) is an aggregate of one or more projects with varying cost allocation percentages from the different shared functions.</p> <p>The percentage allocated to a pipeline is calculated as:</p>	

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
					<p><i>Amounts allocated to pipeline divided by the gross amount across the Jemena Group.</i></p> <p>The shared costs allocated to the pipeline is sourced from SAP using a combination of projects and cost elements.</p>	

8 — STATEMENT OF PIPELINE ASSETS

8. STATEMENT OF PIPELINE ASSETS

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
Table 3.1: Pipeline assets	3.1.a	Initial construction cost, Initial purchase cost, Additions, Additions and improvements capitalised, Capitalised maintenance, Asset disposal (at cost), Depreciation.	Actual	Table 3.3.1: Fixed assets at cost - pipeline assets Table 3.3.2: Shared assets at cost (less straight line depreciation)	All items were populated based on Australian Energy Regulator (AER) designed formulas which referenced the supporting 'Table 3.3.1: Fixed assets at cost - pipeline assets' and 'Table 3.3.2: Shared assets at cost'. <u>Non-core pipeline assets</u> No allocation of non-core pipeline assets has been included in Table 3.1 where there is a remote nexus with the pipeline activities such as treasury hedging financial instruments, defined benefit assets, minor assets sitting in JAM (receivables etc.), and other corporate assets etc.	N/A
Table 3.1: Pipeline assets	3.1.a.1	Other non-depreciable pipeline assets	Actual	SGSPAA Group Consolidation support schedule (Fair Value Adjustments and Goodwill) SAP	<u>Other non-depreciable pipeline assets - SGSPAA Group Consolidation support schedule</u> The SGSPAA Group consolidates its resulting Goodwill from acquisitions at a SGSPAA Group entity level, meaning that it does not pass-on any Goodwill into its subsidiary entities. These SGSPAA Group adjustments are maintained in an excel spreadsheet outside the SGSPAA Group's SAP system and allocated to the SGSPAA Group's cash generating units (e.g. pipelines) for the purpose of impairment testing, in accordance with Australian Accounting Standards. The Guideline does not restrict consideration to only those assets identifiable at the direct pipeline owning entity level and accordingly EGP	As there is no specific Goodwill category, EGP has included Goodwill in the 'Other non-depreciable pipeline assets' in the template.

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
					<p>allocated Goodwill to the pipeline in its statement of assets. EGP considered this a reasonable allocation and disclosure.</p> <p><u>Other non-depreciable pipeline assets – SAP TB</u></p> <p>Amounts have been extracted from EGP's Trial Balances for the reporting period and include GL accounts such as accrued receivables, inventories, deferred tax assets and amounts due from related parties.</p> <p>SAP has functionality that records and identifies any transactions from related parties to EGP, known as trading partner. Related party loan accounts with each trading partner entity were aggregated, where the receivable amount was greater the payable amount the net amount was reported in 'Other non-depreciable pipeline assets'. Where the payable amount was greater than the receivable amount the balance was a net liability and therefore not included in 'Other non-depreciable pipeline assets' in the template. EGP has a legally-enforceable right to set off the recognised amounts and EGP intends either to settle on a net basis or realise the asset and settle the liability simultaneously.</p> <p>In accordance with accounting standards EGP has netted off deferred tax assets and liabilities in its Balance Sheet.</p>

EGP entities share of total revenue is calculated as <i>Revenue related to EGP divided by Total revenue for entities sharing Costs.</i>	N/A

Explanation for Estimated Amounts

For estimated amounts, in accordance with the Guideline Section 7 basis of preparation, the following table explains:

- why it was not possible for the **service provider** to provide actual information;
- what steps the **service provider** took to locate actual information;
- if an estimate has been provided, the basis for the estimate, including the methods, assumptions and inputs used
- why the estimate represents the best estimate possible in the circumstances and has been arrived at on a reasonable basis.

13 — RECOVERED CAPITAL METHOD - PIPELINE ASSETS

ESTIMATED INFORMATION

Table Name	Base Information			Population Approach	Why it was not possible for Jemena Group to provide actual information	Steps Jemena Group took to locate actual information;	Basis for the estimate, including the methods, assumptions and inputs used	Why the estimate represents the best estimate possible in the circumstances and has been arrived at on a reasonable basis.
	Asset Description	Year	Item	Actual / Estimate				
Table 4.1: Recovered capital method - pipeline assets	Pipeline Assets	1998 – 2021	Negative residual value	Estimate	<p>Cost have not yet been incurred to decommission the pipeline, therefore an estimate is inherently required to measure future costs.</p> <p>Further the actual timing of decommissioning the pipeline is also uncertain (estimated to be 2070) therefore increasing the level of estimation required.</p> <p>Further, the CPI escalation factor</p>	No steps taken as actual information does not exist.	<p>Negative residual value is calculated as:</p> $PV(Decommissioning)_t = C_{T_E} \times \frac{(1+i)^{T_D-T_E}}{(1+r)^{T_D-t}}$ <p>Where:</p> <ul style="list-style-type: none"> C_{T_E} is the estimated cost of decommissioning in dollars as at time T_E T_D is the expected year of decommissioning (e.g. 2070 in the case of the EGP) i is the estimated inflation rate r is the estimated discount rate t is the year of the estimate <p>An expert Engineering report obtained in 2011 is the basis for estimating the decommissioning cost (C_{T_E}).</p> <p>Phasing of Negative Residual value The year 1 value of the decommission cost was reported in year 1. The cost of debt incremental was then reported for each subsequent year.</p>	<p>The estimate is a best estimate because it has been calculated based on the following inputs which are sourced based on best available information:</p> <ul style="list-style-type: none"> Independent technical engineering estimate of the cost to decommission the pipeline. Discount rate: 5 year average for the 15 year Australian Government Securities (AGS) bond rate. CPI escalation: SGSPAA internal CPI estimate (reasonable when compared with Australian Bureau of Statistics (ABS) rate).

Table Name	Base Information			Population Approach	Why it was not possible for Jemena Group to provide actual information	Steps Jemena Group took to locate actual information;	Basis for the estimate, including the methods, assumptions and inputs used	Why the estimate represents the best estimate possible in the circumstances and has been arrived at on a reasonable basis.
	Asset Description	Year	Item	Actual / Estimate				
					and the discount rate inputs are estimates used to inflate for forecast future price increases and then discount to the present value respectively.			The year of decommissioning is estimated to be 2070 which is consistent with business plans and no contradictory information was noted.
Table 4.1: Recovered capital method - pipeline assets	Pipeline Assets	Jul 2000- Dec 2006	Additions	Estimate GST taxable supply and GST free split	After 1 July 2000 10% GST was charged on taxable supplies. This GST component of spending would have been refunded by the ATO and therefore does not represent a cash flow on the pipeline.	SGSPAA reviewed internal records and records of historical ownership changes to determine what information was available. Previous owners were contacted but a response was not received.	The taxable supply and GST free Capex split was estimated as 96.1% and 3.9% respectively. This split was calculated based on Major Capex projects from 2013–2016, and so we assume that this split would apply to additions over the 1999–2002 period. All additions are incurred mid-year.	External contractors are generally engaged to perform the work required for Capex additions. No change is noted in the spending split between taxable supply and GST free spending over the life of the pipeline. Therefore the 2013-2016 major projects taxable supply and GST free split represents the best available information.

					activities would be expected to exist and therefore should be allocated to the EGP.			information not being available. On the basis of these inputs the shared cost estimate represent our best estimate and has been arrived at on a reasonable basis.
Table 4.1: Recovered capital method - pipeline assets	Pipeline Assets	2010 - 2018	Operating expenses	Estimate relating to VicHub costs recorded within EGP	Maintenance operating expenses were undertaken on behalf of VicHub by the EGP over the period from 2010 to 2018, inclusive. Records were not retained to enable the VicHub component to be measured.	Records do not exist to enable the VicHub component to be measured, therefore no further steps were taken to locate actual information.	The maintenance operating expenditure was estimated based on an engineering experts cost build-up of the standard maintenance activities and costs incurred each year for VicHub.	This represents a best estimate because it is built-up based on an asset specific information and understanding i.e. an engineering experts understanding of the standard maintenance activities and costs incurred each year for VicHub.

RECOVERED CAPITAL METHOD - PIPELINE ASSETS — 13

Table Name	Base Information			Population Approach	Why it was not possible for Jemena Group to provide actual information	Steps Jemena Group took to locate actual information;	Basis for the estimate, including the methods, assumptions and inputs used	Why the estimate represents the best estimate possible in the circumstances and has been arrived at on a reasonable basis.

Table 4.1: Recovered capital method - pipeline assets	Pipeline Assets	2007 - 2021	Net tax liabilities	Estimate	<p>EGP is part of a consolidated tax group and does not pay corporate tax as a stand-alone entity. Therefore the net tax liability needs to be estimated.</p> <p>Actual total asset data was not available for each of the pipelines EGP, QGP and VicHub from 2008 to 2011. Therefore total assets could not be used as a basis to allocate interest costs across the pipelines.</p>	<p>No steps taken as actual information does not exist for net tax liabilities.</p> <p>Actual total asset data was not available for each of the pipelines EGP, QGP and VicHub from 2008 to 2011. Therefore not steps were taken to locate actual information.</p>	<p>Estimated based on calculation of Earnings before Interest, Tax, Depreciation and Amortisation (EBITA)</p> <p>Less Tax Depreciation</p> <p>Less notional interest</p> <p>Multiplied by the corporate tax rate (30 percent).</p> <p>The EBITA has been reviewed to identify material non-cash items that may require adjustment when estimating the net tax liability cash flow.</p> <p>Tax Depreciation (1998 – 2006) was calculated as: LTD Net Capex divided by the estimated tax useful life years.</p> <p>Tax useful life was estimated based on a useful life that align with tax depreciation amounts for 2007 sourced from the SAP Fixed Asset Tax Register.</p> <p>The aggregate 2012 and 2013 percentage split of interest expense between EGP, Vic Hub and QGP was used to allocate total pipeline interest between pipelines for the period 2008 – 2011.</p>	<p>EBITA is the best approach for calculating the cash flows each year and therefore is the most appropriate input into the net tax liability calculation.</p> <p>EBITA has been sourced from actual historic records and therefore has been arrived at on a reasonable basis.</p> <p>The first year of post-acquisition tax depreciation is the most appropriate basis to estimate pre-acquisition tax depreciation because it is based on an actual data source.</p> <p>The 2012 to 2013 interest split</p>

13 — RECOVERED CAPITAL METHOD - PIPELINE ASSETS

Table Name	Base Information			Population Approach	Why it was not possible for Jemena Group to provide actual information	Steps Jemena Group took to locate actual information;	Basis for the estimate, including the methods, assumptions and inputs used	Why the estimate represents the best estimate possible in the circumstances and has been arrived at on a reasonable basis.
	Asset Description	Year	Item	Actual / Estimate				
								percentages between EGP, QGP and VicHub was the best estimate for the years 2008 to 2011 because it is the closest time periods where actual data was available. Further the average pipeline interest for the 2012 & 2013 period most closely aligned with the average pipeline interest for the 2008 to 2011 period.
Table 4.1: Recovered capital method - pipeline assets	Pipeline Assets	1998 – 2021	Rate of return	Estimate	The Guideline advises that the rate of return should be determined each year and should be commensurate with the prevailing conditions in the market for funds and reflect the	Actual information does not exist for the rate of return. SGSPAA estimated the rate of return as a WACC and sourced actual data to input into the WACC calculation.	Refer to Table 4.1: Recovered capital method - pipeline assets - rate of return explanation above.	Using a WACC as an estimate for rate of return is an accepted methodology adopted by the Australian Energy Regulatory (AER) and therefore represents the best estimate possible. The data inputs into the WACC have been sourced from published AER accepted sources

Table Name	Base Information			Population Approach	Why it was not possible for Jemena Group to provide actual information	Steps Jemena Group took to locate actual information;	Basis for the estimate, including the methods, assumptions and inputs used	Why the estimate represents the best estimate possible in the circumstances and has been arrived at on a reasonable basis.
	Asset Description	Year	Item	Actual / Estimate				
					<p>risk EGP face in providing pipeline services.</p> <p>The Guideline Explanatory Statement (pg. 25) advises with regard to the 'Commercial rate of return' that 'Service provides will be able to determine how this input is estimated'. Usage of the term 'estimated' in the Guideline Explanatory Statement implies that SGSPAA is required to estimate this data input.</p>	<p>The rate of return is a theoretical concept and does not reference EGP costs, rather it references regulatory decisions that have been applied to the relevant time period.</p>		<p>and therefore is a best estimate which has been arrived at on a reasonable basis.</p>

13 — RECOVERED CAPITAL METHOD - PIPELINE ASSETS

Table Name	Base Information			Population Approach	Why it was not possible for Jemena Group to provide actual information	Steps Jemena Group took to locate actual information;	Basis for the estimate, including the methods, assumptions and inputs used	Why the estimate represents the best estimate possible in the circumstances and has been arrived at on a reasonable basis.
	Asset Description	Year	Item	Actual / Estimate				
Table 4.1.1: Capital expenditure greater than 5% of construction cost	4.1.1.a	2001	Description of works	Estimate	This expenditure was incurred prior to Jemena's acquisition of the pipeline. To the best of our knowledge and belief Jemena does not have within its possession or control, information that could be used to provide a description of works that were undertaken in 2001.	Enquiries were made with previous owners however Jemena was unable to obtain a description of the works undertaken in 2001.	Previous owner statutory accounts were relied upon for the RCM Capex Additions input. The statutory accounts do not include detailed descriptions of Capex spend.	This is a best estimate based on the statutory account source relied upon. No description of the works undertaken has been included because data is not available.

14. PIPELINE DETAILS

Table Name	Item	Actual / Estimate	Source	Methodology	Assumptions
Table 4.2: Pipeline details	Construction date	Actual	Westcoast Energy, Annual Report 1998, pg. 20	Extracted from report.	Construction date is interpreted as the mid-point of the year when construction commenced
Table 4.2: Pipeline details	Negative residual value	Estimate	Refer to 'Table 4.1: Recovered capital method - pipeline assets' source.	Refer to 'Table 4.1: Recovered capital method - pipeline assets' methodology explanation.	Refer to 'Table 4.1: Recovered capital method - pipeline assets' assumptions.

15. CAPITAL EXPENDITURE

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
Table 4.1.1: Capital expenditure greater than 5% of construction cost	4.1.1.a	Description of works, Date recognised, Expenditure (\$ nominal)	<p>Estimate: 2001</p> <p>Actual: <u>2008, 2014 and 2015:</u></p>	SAP (Referencing the RCM template)	<p>EGP analysed the underpinning data for the RCM template and with a view to identifying any capex that is > than 5% of the construction cost. EGP had capex that met the criteria of the template in: 2001, 2008, 2014 and 2015.</p> <p><u>2001:</u> This expenditure was incurred prior to Jemena’s acquisition of the pipeline. To the best of our knowledge and belief EGP does not have within its possession or control, information that could be used to provide a description of works that were undertaken in 2001. Enquiries were made with previous owners however EGP was unable to obtain a description of the works undertaken in 2001. Refer to Explanation of estimated amounts (pg. 68) for further details of this estimate.</p> <p><u>2008, 2014 and 2015:</u> EGP extracted Description of works, Date recognised and Expenditure (\$ nominal) from the SAP FAMR.</p> <p><u>Mid-point Net Capital Expenditure Gross Up</u> SAP FAMR Expenditure (\$ nominal) are escalated to a mid-year point to account for the return on capital for capital expenditure incurred during the year.</p>	EGP has interpreted that the capex required in the template is for the life to date basis for the pipeline. For the Jun18 disclosures, EGP interpreted that the capex required in the template only related to the period 1 Jan 18 to 30 Jun 18.

					<p style="text-align: center;"><i>Mid Point Gross Capex</i></p> $= Capex \times (1 + Rate\ of\ Return\ percentage)^{0.5}$ <p>The Rate of Return percentage input calculation methodology is further explained with the Recovered Capital Method above (refer to 'Rate of Return' item).</p>	

16. WEIGHTED AVERAGE PRICES

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
Table 5.1 Weighted average prices	5.1.a	Volume	Estimate	<p>PypIT is the best source to provide data for the purposes of calculating the weighted average price since it is the only system that captures information related to revenue, volume and category breakdown and details in the same place.</p>	<p>Data extracted from PypIT is compared and checked against SAP balances and reference tariffs before being categorised accordingly based on service type per details below. Where necessary, data has been manually categorised as follows:</p> <p><u>Categorisation of Charge Method</u></p> <p>The "Other Services" category represents revenue and volumes associated with Firm Park and Premium Park services. As these services are charged on a Maximum Daily Quantity (MDQ) basis they have been categorised as Capacity-based services in the template.</p> <p>The "Postage Stamp Transportation Services" represents revenue and volumes associated with TGP (Tasmanian Gas Pipeline) Transfer Services. Per the Section 5 of the Guideline, these services are where the same charge is payable along the length of the pipeline, irrespective of the distance transported. This includes the TGP Class A service which is a "Firm Forward haul transportation service" and TGP Class B services (B1 and B2) which are "Interruptible or as available transportation services". Firm services are charged on a capacity basis (i.e. MDQ), while Interruptible and As Available services are charged on a volumetric basis (i.e. actual deliveries).</p>	<p>Some specific charges / services are not relevant to the weighted average price calculation (i.e. not part of the service categories required under the weighted average price template as specified in Section 5 of the Guideline). This is discussed further below.</p> <p>In determining the total revenue to be used in calculating the weighted average price, there are certain service types which fall under "Other Direct Revenue" in Table 2.1.1 that were intentionally be omitted from the weighted average price calculation as it does not form part of the main pipeline revenue generating services. These services include:</p> <ul style="list-style-type: none"> - As Available Park Service

Table Name	Base Information		Population Approach	Source	Methodology	Assumptions
	Reference	Item	Actual / Estimate			
					<p>The "Zonal Based Transportation Services" consists of data relating to 4 service types: Firm Forward, Firm Backhaul, As Available Forward and As Available Backhaul.</p> <ol style="list-style-type: none"> 1. Firm Forward data has been reported in the "Firm Forward haul transportation services" row under the capacity based column headings as the charges for these services are based on MDQ volumes. 2. "Interruptible or as available transportation services" consist of revenue and volumes for As Available Forward services. Charges are based on actual delivered volumes and thus captured under the volumetric based column headings which are based on actual delivery volumes. 3. "Backhaul Services" include revenue and volumes for both As Available Backhaul and Firm Backhaul. As there are both firm and as available components, data has been allocated to the appropriate columns i.e. Firm services charged at MDQ reported as capacity based and As Available services charged on actual deliveries recorded as volumetric based data. <p>Volumes are obtained and adjusted per below:</p> <p>Volume Calculation</p> <p>Volume data has been estimated for each service and charge reported in the template by adjusting the raw data obtained</p>	<ul style="list-style-type: none"> - Authorised Overrun Charge - Unauthorised Overrun Charge - Imbalance Charge - Minimum Monthly Service Charge - Odourisation Charge - User Specific Facility Charge - Bairnsdale City Gate Facility Charge - Shipper Specific Facility Charge - Transfer Service. <p>The invoice data in PypIT reflects actual invoicing and has been used as the basis of allocation of revenue to services and charges. Based on the invoice data retrieved from PypIT, the revenue and volume data used in the weighted average price calculation is included/excluded based on</p>

16 — WEIGHTED AVERAGE PRICES
